

Purdue SCALE – Laboratory Activity Form (Instructor Version)

1. Basic Information

Course / Module: _____

Lab Title: _____

Lab Number: _____

Instructor: _____

Date Assigned: _____ Date Submitted: _____

Student Name: _____

Team Members: _____

2. SCALE Competency Area(s) – Instructor Mapping

☐ Trusted Microelectronics

☐ Cybersecurity Fundamentals

☐ Secure Systems Engineering

☐ Supply Chain Risk Management

☐ Embedded Systems Security

☐ Hardware Assurance

☐ Vulnerability Analysis

☐ Lifecycle Security / Sustainment

☐ Other: _____

3. Instructor Prep (Before Lab)

Standards / References Used: _____

Safety Notes / Hazards: _____

Materials Setup Checklist (parts, boards, simulators, accounts): _____

Expected Time on Task: _____ minutes

4. Expected Outcomes / Key Results

1. _____
2. _____
3. _____
4. _____

5. Common Errors / Troubleshooting Notes

1. _____
2. _____
3. _____
4. _____

6. Student Evidence Requirements

- ☐ Photos / screenshots of setup
- ☐ Data table completed (expected vs actual)
- ☐ Code / configuration file attached (if applicable)
- ☐ Short written analysis tied to SCALE competencies
- ☐ Reflection on lifecycle implications (manufacture/deploy/sustain)

7. Grading Rubric (Instructor Use)

Category	Criteria	Points	Score
Safety & Professional Practice	Follows safety rules, uses tools correctly, maintains clean station	10	
Procedure Execution	Completes required steps; demonstrates proper setup and process control	25	
Data Quality	Accurate measurements/logs;	20	

	appropriate units; repeats/controls noted	
Analysis & SCALE Relevance	Explains results; identifies risks/vulnerabilities; lifecycle considerations	25
Documentation	Clear, complete, well-organized submission; evidence attached	20

Total Score: _____ / 100

Feedback / Notes:

8. Instructor Verification

Lab Completed Successfully: ☐ Yes ☐ No

Instructor Signature: _____ Date: _____
